### 210103250 - SHUSIL MEDIUM A20 (B) 250 ML

according to 29 CFR 1910.1200

	dhesiv		210103250	- SHUSIL MEDIUM A20 250 ML	(B)	
Printing:	12/12/2	024 Date	of compilation: 7/11/2023	Revised: 8/25/2023	Version: 2 (Replaced 1)	
SECT	TION 3	: COMPOSITI	ION/INFORMATION ON	INGREDIENTS		
3.1	Subst	ances:				
	Non-a	oplicable				
3.2	Mixtu					
	Chem	ical description	: Silicone-based mixed solve	ent		
	Comp	onents:				
	and/or	exact percentag	e (concentration) of composit		ortable limits. The specific chemica ade secret in accordance with para ct contains:	
		Identification		Chemical name		Concentration
	CAS:	556-67-2	Octamethylcyclotetrasiloxane			0,1 - <0,25 %
	To obt	ain more informa	tion on the hazards of the su	bstances consult sections 11,	, 12 and 16.	
	Additic	on cross-linking s	ilicone polymer, contains hyd	rogen functional polysiloxane		
SECT	FION 4	: FIRST-AID N	MEASURES			
4.1	Desci	iption of neces	sary measures:			
	The symptoms resulting from intoxication can appear after exposure, therefore, in case of doubt, seek medical attention for direct exposure to the chemical product or persistent discomfort, showing the SDS of this product. By inhalation:					tion for direct
	This product does not contain substances classified as hazardous for inhalation, however, in case of symptoms of intoxication remove the person affected from the exposure area and provide with fresh air. Seek medical attention if the symptoms get worse or persist. By skin contact:					
	In case of contact it is recommended to clean the affected area thoroughly with water and neutral soap. In case of changes to the skin (stinging, redness, rashes, blisters,), seek medical advice with this Safety Data Sheet <b>By eye contact:</b>					
	This product does not contain substances classified as hazardous for eye contact. Rinse eyes thoroughly for at least 15 minutes with lukewarm water, ensuring that the person affected does not rub or close their eyes. By ingestion/aspiration:					t 15 minutes
	In cas	e of consumption	n, seek immediate m <mark>edical as</mark>	sistance sho <mark>w</mark> ing the SDS of	this product.	
4.2	Most	important symp	otoms/effects, acute and de	layed:		
	Acute	and delayed effe	ects are indicated in sections	2 and 11.		
4.3	Indica	tion of immedia	ate medical attention and s	pecial treatment needed, if i	necessary:	
	Not ap	oplicable (N/A)				
SECT	FION 5	: FIRE-FIGHT	ING MEASURES			
5.1	Suitab	le (and unsuital	ble) extinguishing media:			
		le extinguishing				
	Product is non-flammable under normal conditions of storage, manipulation and use, but the product contains flammable substances. In the case of inflammation as a result of improper manipulation, storage or use preferably use polyvalent powder extinguishers (ABC powder), in accordance with the Regulation on fire protection systems. Unsuitable extinguishing media:					

IT IS RECOMMENDED NOT to use full jet water as an extinguishing agent.

#### 5.2 Specific hazards arising from the chemical:

As a result of combustion or thermal decomposition reactive sub-products are created that can become highly toxic and, consequently, can present a serious health risk.

#### 5.3 Special protective equipment and precautions for fire-fighters:

### 210103250 - SHUSIL MEDIUM A20 (B) 250 ML

Revised: 8/25/2023

## Printing: 12/12/2024 Date of compilation: 7/11/2023

11011000.0/20/

version. 2 (Replaced T)

### SECTION 5: FIRE-FIGHTING MEASURES (continued)

Depending on the magnitude of the fire it may be necessary to use full protective clothing and individual respiratory equipment. Minimum emergency facilities and equipment should be available (fire blankets, portable first aid kit,...) Additional provisions:

As in any fire, prevent human exposure to fire, smoke, fumes or products of combustion. Only properly trained personnel should be involved in firefighting. Evacuate nonessential personnel from the fire area. Destroy any source of ignition. In case of fire, refrigerate the storage containers and tanks for products susceptible to inflammation. Avoid spillage of the products used to extinguish the fire into an aqueous medium.

### SECTION 6: ACCIDENTAL RELEASE MEASURES

### 6.1 Personal precautions, protective equipment and emergency procedures:

#### For non-emergency personnel:

Isolate leaks provided that there is no additional risk for the people performing this task. Evacuate the area and keep out those without protection. Personal protection equipment must be used against potential contact with the spilt product (See section 8). Above all prevent the formation of any vapour-air flammable mixtures, through either ventilation or the use of an inert medium. Remove any source of ignition. Eliminate electrostatic charges by interconnecting all the conductive surfaces on which static electricity could form, and also ensuring that all surfaces are connected to the ground.

### For emergency responders:

Wear protective equipment. Keep unprotected persons away. See section 8.

#### 6.2 Environmental precautions:

This product is not classified as hazardous to the environment. Keep product away from drains, surface and underground water.

### 6.3 Methods and materials for containment and cleaning up:

For accidental releases in excess of reportables quantities (RQ) (Table 302.4), refer to 40 CFR 302 for detailed instructions concerning reporting requirements and notify the National Response Center (800) 424-8802.

Absorb the spillage using sand or inert absorbent and move it to a safe place. Do not absorb in sawdust or other combustible absorbents. For any concern related to disposal consult section 13.

## 6.4 Reference to other sections:

See sections 8 and 13.

### SECTION 7: HANDLING AND STORAGE

### 7.1 Precautions for safe handling:

Comply with the current legislation concerning the prevention of industrial risks with regards manually handling weights. Maintain order, cleanliness and dispose of using safe methods (section 6).

B.- Technical recommendations for the prevention of fires and explosions

Avoid the evaporation of the product as it contains flammable substances, which could form flammable vapour/air mixtures in the presence of sources of ignition. Control sources of ignition (mobile phones, sparks,...) and transfer at slow speeds to avoid the creation of electrostatic charges. Consult section 10 for conditions and materials that should be avoided.

C.- Technical recommendations on general occupational hygiene

PREGNANT WOMEN SHOULD NOT BE EXPOSED TO THIS PRODUCT. Transfer in fixed places that comply with the necessary security conditions (emergency showers and eyewash stations in close proximity), using personal protection equipment, especially on the hands and face (See section 8). Limit manual transfers to containers of small amounts. Do not eat or drink during the process, washing hands afterwards with suitable cleaning products.

D.- Technical recommendations to prevent environmental risks

It is recommended to have absorbent material available at close proximity to the product (See subsection 6.3)

### 7.2 Conditions for safe storage, including any incompatibilities:

A.- Specific storage requirements

Minimum Temp.:	41 °F
Maximum Temp.:	68 °F
Maximum time:	36 Months

B.- General conditions for storage

Avoid sources of heat, radiation, static electricity and contact with food. For additional information see subsection 10.5

A.- General precautions for safe use

#### 210103250 - SHUSIL MEDIUM A20 (B) 250 ML Printing: 12/12/2024 Date of compilation: 7/11/2023 Revised: 8/25/2023 Version: 2 (Replaced 1) SECTION 7: HANDLING AND STORAGE (continued) 7.3 Specific end use(s): Except for the instructions already specified it is not necessary to provide any special recommendation regarding the uses of this product. SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION 8.1 **Control parameters:** Substances whose occupational exposure limits have to be assessed in the workplace: There are no applicable occupational exposure limits for the substances contained in the product 8.2 Appropriate engineering controls: A.- Individual protection measures, such as personal protective equipment As a preventative measure it is recommended to use basic Personal Protection Equipment. For more information on Personal Protection Equipment (storage, use, cleaning, maintenance, class of protection,...) consult the information leaflet provided by the manufacturer. For more information see subsection 7.1. All information contained herein is a recommendation, the information on clothing performance must be combined with professional judgment, and a clear understanding of the clothing application, to provide the best protection to the worker. All chemical protective clothing use must be based on a hazard assessment to determine the risks for exposure to chemicals and other hazards. Conduct hazard assessments in accordance with 29 CFR 1910.132. **B.-** Respiratory protection The use of protection equipment will be necessary if a mist forms or if the occupational exposure limits are exceeded. C.- Specific protection for the hands Remarks Pictogram PPE Replace gloves in case of any sign of damage. For prolonged periods of exposure Protective gloves against minor risks (Material: to the product for professional /industrial users, we recommend using chemical Fluorine Rubber, Breakthrough time: > 60 min, protection gloves. Use gloves in accordance with manufacturer's use limitations Thickness: 0.7 mm) and OSHA standard 1910.138 (29CFR) Mandatory hand protection As the product is a mixture of several substances, the resistance of the glove material can not be calculated in advance with total reliability and has therefore to be checked prior to the application. D.- Eye and face protection PPE Remarks Pictogram Clean daily and disinfect periodically according to the manufacturer's instructions. Use if there is a risk of splashing. Use this PPE in accordance with manufacturer's use limitations and OSHA standard 1910.133 (29CFR) Panoramic glasses against splash/projections. Mandatory face protection E.- Bodily protection Pictogram PPF Remarks Work clothing Replace before any evidence of deterioration. Anti-slip work shoes Replace before any evidence of deterioration. F - Additional emergency measures Emergency measure Standards Emergency measure Standards **O**. ANSI Z358-1 DIN 12 899 ISO 3864-1:2011, ISO 3864-4:2011 ISO 3864-1:2011, ISO 3864-4:2011

SEC	SECTION 10: STABILITY AND REACTIVITY					
10.1	Reactivity:					
	No hazardous reactions are expected because the product is stable under recommended storage conditions. See section 7 from					
10.2	Safety Data Sheet. 2 Chemical stability:					
	Chemically stable under the indicated conditions of storage, handling and use.					
10.3	Possibility of hazardous reactions:					
	Under the specified conditions, hazardous reactions that lead to excessive temperatures or pressure are not expected.					
10.4 Conditions to avoid:						
	Applicable for handling and storage at room temperature:					
Shock and friction Contact with air Increase in temperature Sunlight H						
	Not applicable	Not applicable	Precaution	Precaution	Not applicable	
10.5	5 Incompatible materials:					
	Acids	Water	Oxidising materials	Combustible materials	Others	
	Avoid strong acids	Not applicable	Avoid direct impact	Not applicable	Avoid alkalis or strong bases	
10.6	Hazardous decomposition products:					
	See subsection 10.3, 10.4 and 10.5 to find out the specific decomposition products. Depending on the decomposition conditions, complex mixtures of chemical substances can be released: carbon dioxide (CO <sub>2</sub> ), carbon monoxide and other organic					

## SECTION 11: TOXICOLOGICAL INFORMATION

### 11.1 Information on toxicological effects:

compounds.

The experimental information related to the toxicological properties of the product itself is not available

### Dangerous health implications:

In case of exposure that is repetitive, prolonged or at concentrations higher than recommended by the occupational exposure limits, it may result in adverse effects on health depending on the means of exposure:

### SECTION 13: DISPOSAL CONSIDERATIONS

### 13.1 Disposal methods:

IT IS THE RESPONSIBILITY OF THE WASTE GENERATOR TO EVALUATE WHETHER HIS WASTES ARE HAZARDOUS BY CHARACTERISTICS OR LISTING.

### Waste management (disposal and evaluation):

Follow RCRA framework and EPA regulation for to ensure that hazardous waste is managed safely and properly. Waste should not be disposed of to drains. Remind, It is the responsibility of the waste generator to evaluate whether his wastes are hazardous by characteristics or listing. See section 6 for further information about Accidental release measures.

### Regulations related to waste management:

Legislation related to waste management:

40 CFR Solid Wastes - Part 239 through 282.

State regulatory requirements for generators may be more stringent than those in the federal program. Be sure to check the state's policies.

## SECTION 14: TRANSPORT INFORMATION

### Transport of dangerous goods by land:

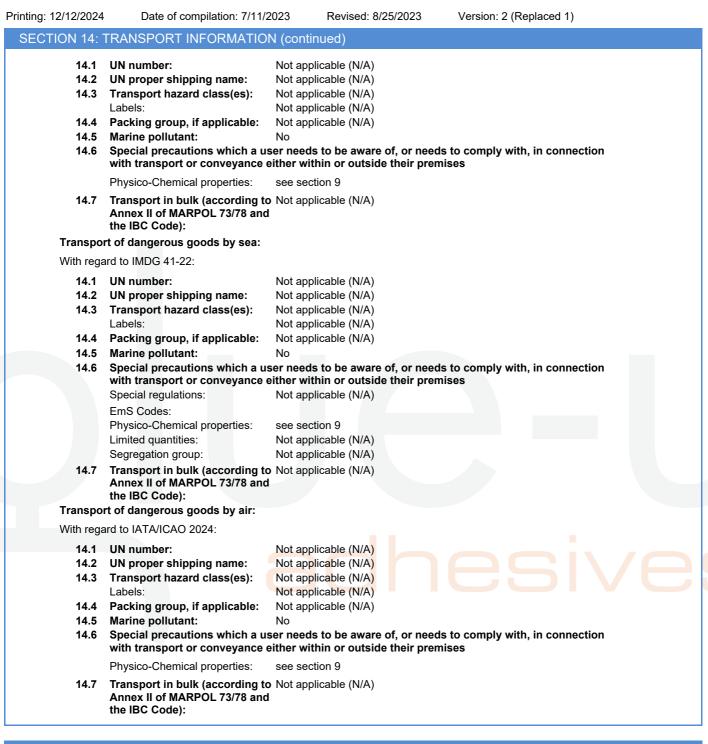

With regard to 49 CFR on the Transport of Dangerous Goods:

Safety data sheet according to 29 CFR 1910.1200

210103250 - SHUSIL MEDIUM A20 (B)

250 ML

### SECTION 15: REGULATORY INFORMATION

15.1 Safety, health and environmental regulations specific for the product in question:

Specific provisions in terms of protecting people or the environment:

It is recommended to use the information provided in this safety data sheet as a foundation for conducting workplace-specific risk assessments. These assessments will help establish the appropriate risk prevention measures for handling, using, storing, and disposing of this product.

### Other legislation:

Take into consideration other applicable federal, state, and local laws and local regulations.

### **SECTION 16: OTHER INFORMATION**

### Legislation related to safety data sheets:

This safety data sheet has been designed in accordance with Appendix d to §1910.1200 - Safety data sheets

Texts of the legislative phrases mentioned in section 2:

### H361: Suspected of damaging fertility or the unborn child.

### Advice related to training:

According to 29 CFR 1910. 1200, training on chemical hazards is necessary for employees using this product. This training will facilitate their understanding and interpretation of the safety data sheet, as well as the product label.

### Principal bibliographical sources:

Occupational Safety & Health Administration (OSHA).
